Product Designer with 10 years of experience in product design, design systems, and UX research. I design intuitive, meticulously researched, data-driven digital products for in-house teams at established brands, bringing AI integration and automation into the process to reduce friction for users and teams alike.

EXPERIENCE

Product Design Lead · WSA

Sep 2023 – Present

- Led design of Summit, an event and community app for WSA, built with a developer co-founder for a Chairman whose bar was engagement between events. 60% attendee adoption, still used up to two months after events; now an independent product serving other clients.
- Designed wireframes, user flows, and high-fidelity UI for the Summit mobile app from early discovery through component handoff to developers.
- Owned the strategy and optimization of WSA's digital ecosystem (website, social, newsletters), driving +169% website traffic and significant audience growth across all channels over two years.
- Designed and helped develop localized country pages with WSA's community manager and a part-time developer, simplifying access to rules, profiles and application flows. Within 3 months, 19% of users were visiting these pages.
- Introduced personalized regional newsletters through segmentation of a 20K-subscriber newsletter audience, boosting open rates by 38%.
- Conducted user interviews and discovery cycles that informed app and website updates.
- Created chatbots for WSA events trained on data of the sessions, workshops, locations, speakers, winners, attendees, sponsors and visa info to help attendees navigate the event.

Product Designer · 5Mins

Sep 2022 – Sep 2023

- Designed gamification systems and social interaction features (user flows, interaction patterns and UI components) for a learning platform that increased 7-day retention by 18%.
- Migrated the design system from Sketch to Figma and kept it in sync with the developers' Storybook: aligning Storybook to Figma where brand consistency or information hierarchy was at stake, and Figma to Storybook where their components simplified the app's logic.

Growth Product Designer · SwissBorg

6-month contract · Mar 2022 – Sep 2022

- Proposed and ran 15+ A/B experiments on the SwissBorg website, using the dev team's existing testing setup and adding Hotjar, to grow app downloads and upsell conversion.
- Designed and ran experiments via social campaigns to identify high-converting services, contributing to 25% lower acquisition costs for prioritized offerings.
- Created an ESG monitoring interface for cryptocurrencies, helping users make investments that were better aligned with their values.

UI & Digital Designer · Ria Money Transfer

Sep 2020 – Mar 2022

- Designed Ria's storytelling through social media campaigns, including financial literacy campaign that grew Ria's following by 200%+ (IG) and 70%+ (LI) in under a year.
- Collaborated with HR and Product Marketing to craft a new employer brand identity positioning Ria as a FinTech leader; defined KPIs monitored through LinkedIn interaction data.
- Designed product illustrations and micro-animations for Ria's mobile app to guide users through key flows and improve interface comprehension.
- Unified brand guidelines and created a DAM system used across developer, designer, comms, marketing, and brick-and-mortar teams.

Product Designer · Saturno Design

Sep 2016 – Aug 2019

- Established and oversaw implementation of new Saturno brand guidelines.
- Created 13 design packages (website, email and proposal templates, with component standards for each) for clients including K&L Gates, Barclay Damon and FordHarrison, balancing a design-led PM's bar for craft with developers' limited time.
- Created the interface for the Century 21 Web App, including interactive components like the mortgage calculator and real estate agent cards.
- Introduced video hero banners and promo videos into Saturno's design package.
- Created a marketing campaign for LensBaby, reframing their products as videography tools to enter a new and growing market.

Independent Projects & Ventures

Sep 2013 – Present

- Conducted UX research for Hilti, analysing 4,000+ customer emails, 200 surveys and 20 in-depth interviews to trace churn among lower-income customers to cost-structure confusion rather than product quality; proposed a rent-vs-buy value calculator to address it.
- Designed and built kremsegg-university.at with an AI editor that lets non-technical staff change the live site in plain English, with a preview, version history and confirmation before anything publishes.

EDUCATION

IE Business School

Sep 2019 – Jul 2020

Master in Customer Experience & Innovation

New York Institute of Technology

Sep 2008 – Jul 2012

Bachelor of Arts in Graphic Design

SKILLS & TOOLS

Design & Craft: Figma, Storybook, Adobe CS, Design systems, Prototyping, Micro-animations, Motion Graphics, Visual design

Research & Insights: User interviews, Usability testing, Synthesis, Analytics (GA4, Mixpanel)

Product & Growth: A/B testing, Funnel optimisation, Experimentation frameworks, Information architecture

Web Development: HTML, CSS, JavaScript, PHP, WordPress, GitHub

AI & Automation: Generative AI, GPT APIs, Claude, Agentic workflows, n8n
